

# RUSTPROTEC S30

## Product Description

RUSTPROTEC S30 is a solvent type rust preventive product which contains rust inhibitor additive. It provides a thin film on metal surface which is easy for cleaning and suitable for up to 3 months rust prevention. Moreover, the water-repellent agent, an additive in solvent, particularly assists at high-humidity application.

## Benefits

- Good water repel property
- Provides thin film and easy to clean
- Offers up to 3 months rust protection

## Applications

- Suitable for preventing rust on metal surface via dipping brushing and spraying
- Can be used with wet workpieces without drying process
- Provide anti-rust prevention at least 1 month and up to 3 months if store in shade and under low humidity atmosphere

# RUSTPROTEC S30

## Typical Characteristics

Tests	Methods	Units	Results
Appearance	Visual		Brown
Density at 20 °C	ASTM D4052	kg/L	0.7835
Flash Point	ASTM D92	°C	48
Film Thickness	Film weight	Micron	1.65
Humidity Cabinet	ASTM D1748	Day	>30

## Caution

Recommend to apply in air circulation place and keep away from fire source because of volatile solvent components

## Health and Safety

This product shows no significant health or safety hazard when used under the recommended applications and suitable handling.

Avoid the direct contact. Wash immediately after contact. Health and safety information is available on the Safety Data Sheet (SDS) which can be obtained from <http://pttlubricants.pttor.com>

**PTT LUBE SOLUTIONS** Professional Lubricant Service Partner

The product can cause some skin irritation and has flash point higher than 93.4°C

Note: Data and information contained in this publication are based on standard test under laboratory conditions and/or performance test. To consider the use of PTT Lubricants' products in particular application, customer is responsible for determining whether product and information are appropriate for customer conditions or should consult with PTT Lubricants' technical service division. The procedure of using any lubricant may differ or change depended on different machines and their manuals. Therefore, we recommend to read, understand and review the latest SDS in order to ensure the use of product is accomplished safety.
